ABOUT THE JOURNAL

The Journal of Index Investing (JII) provides coverage of the latest innovations in Exchange-Traded Funds (ETFs), Exchange-Traded Products (ETPs), and Indexes. It offers rigorous research and analysis of products, sector allocations, and investment strategies for those creating or investing in index products. The JII addresses challenging ideas and practical tools that help investors to optimize investment prospects, identify innovative uses for indexes, ETFs and ETPs, and incorporate the latest research in the market into their own investment plans. It has a long history of exclusively publishing articles on beta-based products and offering timely analysis of this growing field.

MISSION

To educate investment professionals by providing practitioner-oriented content from industry experts, including research, trends and innovations in Exchange-Traded Funds (ETFs), Exchange-Traded Products (ETPs), and Indexes.
